-

Daily Task Progress

1. SF:

- Working with the user story "Get Guidelines user interface"
- Tracking time using Toggl perfectly.
- Created a Git branch, and implemented the coding section . Faced issues in toggle using.

2. NA:

- Git branch creation, user story coding implementation done perfectly
- Designed the Manage Newsboard layout for admin.
- Keeping track of time using Toggl. Faced issues in unit testing section.

3. SM:

- Created a Git branch for the user story and worked there as well.
- Worked on the user story "Facilitate Training", tried to create a better UI design, was able to generate Javadoc documentation successfully too.
- Using Toggl to track time spent.
- Sometimes forgot to start and stop the toggle timer.

4. SMN:

- Working on the "Inform Media" functionality, completed 100% of the UI design.
- Created a Git branch for the feature.After working on the local pc , pushed the commit to the github successfully.
- Tracking time with Toggl, faced issues with JUnit testing.

5. SS:

- Designing the Archive Data interface, done the coding section successfully.
- Created a Git branch for this feature.Pushed the commit to the github appropriately.
- Using Toggl for time tracking.Faced issue with unit testing and unable to solve the issue yet.

6. MS:

- Working on the "Get Emergency Contact" user interface .Made the design perfectly and done the coding section as well.
- Created a Git branch for this project.
- Tracking time with Toggl.Faced issues with Unit testing.
